How to use DropMind? First, download and install the software program on your computer. The main screen of DropMind will open and will display the “Welcome” message. Once you have completed the install, open the program. The program window will load which includes a workspace displaying the home screen that gives you access to all functions. After you have opened the program, select the drop down menu on the top right of the program window and select New from the menu. In the drop down menu select Text from the menu. Select Text document from the new window and click on the “Save” option at the bottom right of the new window. The file with the word “mymindmap.txt” is saved as a TXT file in your Drop Mind folder. The new text file is blank. You now have an empty mind map. Using DropMind

When you open the mind map, the drop-down menu at the top right of the window will open up and you will see the choices for Text, Customize Background, Add Picture, Insert Hyperlink, and more. Select the “Text” and a menu will come up, from which you will get more options. The first choice is to select what type of mind map you want to do. Drag and drop from left to right to choose which kind you would like to create. There are different types of mind maps which are listed as follow: Stacked Flow Freeform Grouping Simple connection Stacked Flow Freeform Grouping Simple connection Once you click on one of the options, a menu will come up. From that menu, you can choose different options for the topic of your mind map. You can also change the text and format, the background color, and the font type.
